Introduction

This document describes the content of the 1997 interview of the NLSY97 cohort. The Round 1 survey was conducted using three different questionnaires: the Screener, Household Roster, and Non-Resident Roster Questionnaire; the Parent Questionnaire; and the Youth Questionnaire. The Screener, Household Roster, and Non-Resident Roster Questionnaire was administered to a household resident over the age of 18. The Parent Questionnaire was administered to a parent or parent-like figure of the youth residing in the household. The Youth Questionnaire was administered to the youth respondent living in the household. The Youth Questionnaire is included in this document; the Screener and Parent Questionnaires are provided in a separate volume.

This survey was conducted entirely as a computer-assisted interview. Although some cases were done over the telephone, the dominant interview mode was the in-person interview, so we will use the term CAPI (computer-assisted personal interview) to refer to the data collection technology.

Our goal is to make the content of the interview as comprehensible as possible by producing a clear, complete, and compact questionnaire. With this in mind, the 1997 CAPI questionnaires have been formatted as similarly as possible to a conventional questionnaire. They also include some additional information that enhances the usefulness of each questionnaire for data users. The resulting documents accurately summarize the “conversation” between the interviewer and respondent. Suggestions for improving the questionnaire or comments on irregularity should be directed to CHRR User Services.

We use the term “conversation” to emphasize the difference between the questionnaire and the codebook. The codebook contains the data released as a result of the interview, but some information collected during the interview is not present in the codebook. For example, the questionnaire includes questions that collected names of household members, employers, etc. Such items are not released, so the questions that collect them are not present in the codebook. Conversely, the codebook contains some information not directly collected in the interview. For example, while created variables are documented in the codebook, there is no reference to them in the questionnaire as they are not part of the conversation between the interviewer and respondent.

To aid researchers in using the questionnaire, this introduction provides information on several topics. First, typical question blocks are described and key terms such as “R Number,” “Distribution Code Block,” and “Lead in Questions” are defined. This section explains how to follow the flow of the interview through the questionnaire. Second, the instrument compression techniques that have helped us to produce a compact questionnaire are described. Finally, this introductory section concludes with a discussion of save arrays, which provide interviewers with information specific to a given respondent (e.g., employer, name).
I. Types and Formats of Question Blocks

Question records are the building blocks of the CAPI questionnaires, with various types of records performing different data collection and/or manipulation functions. Loosely grouped, CAPI question records will either: (a) provide administrative information that assists the interviewer or provides an introduction to the next question, (b) provide question text and control for data entry of the response, or (c) perform internal operations and calculations to guide the interview and maintain the internal data storage during the interview. All question records essential to understanding either the content of the survey or the flow of respondents through the interview will appear within these 1997 NLSY97 questionnaires.

To aid users, the 1997 questionnaire contains some elements found in the 1997 NLSY97 codebook. For instance, codebook reference numbers are provided for question items and additional information such as universe skip patterns are included in each question block. Additionally, many of the elements not essential to understanding the conversational flow of the interview have been removed, making each question block less cluttered and easier to read.

Figure 1 shows the format of a typical question block; the various information fields are then explained in the following paragraphs.

Lead In(s):
Default Next Question:

Figure 1. CAPI Question Block

A. Question Name

Question names are designed to be the unique identifiers assigned to identical questions across survey years. Each question in the Youth Questionnaire has a four letter base before the number (e.g., YSCH-1600). The first letter, Y, indicates that this is a question asked of the youth respondents. This questionnaire is subdivided into the following sections: Information (YINF), CPS (YCPS), Schooling (YSCH), Peers (YPRS), Time Use (YTIM), Employment (YEMP), Training (YTRN), Health (YHEA), Self–Administered (YSAQ), Marriage (YMAR), Fertility (YFER), Program Participation (YPRG), Income and Assets (YINC), Expectations (10-point scale) (YEXP), PIAT Math (YPIA), Locator (YLOC), and Interviewer Remarks (YIR).

The Screener Questionnaire has a two letter base before the number (e.g., SE-100). The first letter, S, indicates that this is a question from the Screener question group; the second letter indicates the subset of the Screener group. The Parent Questionnaire has question names with bases varying from one letter and one or two numbers to four letters (e.g., PC8-100). Again, the first letter, P, indicates that this is a question from the Parent Questionnaire. The subsections of these questionnaires are described in detail within the introduction of their survey volume.
B. R Number
The NLSY97 identifies the variables by reference numbers (R numbers). The identifier for a particular variable in a particular year does not change, even as new waves are released. The R number has the format Rxxxxx. Every question in the questionnaire which appears in the codebook has its reference number printed next to it as an identification. This allows the user to identify immediately which items he or she will be able to extract from the CD and to find a given question on the CD with a minimum amount of effort. Any item that is not in the public use data set will not have an R number in this questionnaire; these items are identified by question name only.

Most questions generate a single variable in the codebook; some, however, will generate more than one variable. For example, some questions collect information about the date an event happened and split this information into three separate variables: month, day and year. Some questions offer a respondent several answers to choose from with the instruction to choose all that apply, generating a great many variables. In these questions, each possible outcome is a distinct variable, coded as “selected,” “not selected,” or “valid skip.”

C. Question Text
This field contains the text of the question that the interviewer asked the respondent or other information used to direct the flow of the interview. The following types of text may appear:

- **Question Text:** Text that is asked of the respondent appears in a conventional mixture of upper and lowercase letters.
- **INTERVIEWER COMMENTS:** Text in all uppercase is either an instruction to the interviewer or a clarifying comment. NORC interviewers do not read these items to the respondent.
- **Internal Code:** When a question record contains a machine instruction, that instruction is printed in this field. Such instructions end with a semi-colon. These instructions are accompanied by internal comments as described below.

/* comments */

Internal comments that explain what a machine instruction does are set off by a leading “/*” and a trailing “*/.” These comments explain the function being performed by the internal code so that persons unfamiliar with the command system can follow the interview protocol.

D. Distribution Code Block
When a question requires the choice of one or more items from a predefined list, that list, or distribution code block, is shown in the question block. Each item in the distribution code block has three components:

- **Code:** The numeric code associated with each possible response is listed first. All data in the NLSY97 public use data file are numeric, so each possible item that could be selected is associated with an integer.
- **Text:** Next is the item text or description of the code, such as “Yes” or “No.” If the question uses a “show card” (this will be indicated in the question text field), the items on the show card are sometimes identified by letters or numbers; these letters or numbers are included with the response text in this questionnaire.
- **Skip:** When the selection of a specific response determines which question will be asked next, a (GO TO Rxxxxx) or (GO TO YSCH-nn) notation follows the response text.

For some questions that collect numeric data (hours, weeks, dollar amounts, etc.), the question block contains what appears to be a distribution code block. This is present whenever the next question to be asked depends upon the numeric value falling in some range. In such cases the distribution code block is constructed so it corresponds to these
skip conditions. However, the interviewer would actually enter the exact number provided by the respondent and this exact number would be recorded in the data set.

E. Lead in Questions
The CAPI questionnaires include a “Lead in(s)” field in the question block. The field lists the questions that lead into each particular item. By tracing the skip pattern backward, the user is able to determine the universe of respondents asked a given question. Examples:

YSCH-1200 [Default] This means that the default path from question YSCH-1200 leads to the current question, but there may be conditions under which a different path would be taken.

YSCH-1200 [1:4] This means that whenever the response category for question YSCH-1200 takes on the values one to four (inclusive), the next question will be the current question record. If the response is some other value, the respondent may next be asked a different question.

F. Default Next Question
This field specifies the question to be asked next unless another skip specification in the distribution code block applies.
II. Instrument Compression

In order to provide a more compact questionnaire, two types of records have been dropped. The following do not appear within this questionnaire: (1) “looped” questions or repetitive series and (2) question records that perform internal operations not necessary for understanding the conversational flow of the survey.

First, repetitions of questions that asked multiple times are not included. Questions appearing in loops will be enclosed inside a special type of question called a REPEAT command, which begins a loop, and the UNTIL command, which will end the loop. For example, the CAPI instrument asks questions about the education, employment, etc., for up to twenty persons in the household. Instead of printing all twenty sets of questions, only the questions for the first person are printed.

Second, the instrument was compressed by eliminating question records that contained only nonessential skip pattern information. The 1997 CAPI instrument included 6,659 numbered question records (Screener 1,115; Parent 525; and Youth 4,019), only some of which are essential to understanding the action content and conversational flow of the survey. The process of dropping unessential records and then changing the lead in and next question specifications so that the skip pattern does not have any gaps is referred to as “skip pattern compression.” The resulting questionnaire still contains all relevant information about skip patterns and universes and is easier for researchers to use.

All questions that were part of the original questionnaire and appear as variables on the Round 1 CD have been included in this questionnaire, even those questions that perform internal operations with no skip pattern implications.

NOTE: A number of questions in the CPS and Employment sections refer back to the date of last interview. Because Round 1 was the initial year of the survey, these questions were effectively unreachable, and the frequency counts for all such questions will be zero. These questions have been designed for use in future rounds of the NLSY97 and have been included in the first round due to the questionnaire programming process.
III. Save Array

“Save arrays” are fields in which information is stored. Each such field, or save array, is assigned a name. For example, the name of the respondent’s current employer would be stored in the “EMPLOYER.NAME(1)” save array for use during the interview. This “save array name” is then used to reference and access the data in the save array field during the actual operation of the survey. Each time a question refers to the current employer, the computer automatically inserts the name of the employer into the question. Information stored in save arrays is used:

a) as part of the actual text of survey questions (e.g., the name of a given household member, child, employer, types of training programs, different sources of income for household members);

b) to govern paths through the questionnaire. The save array field is accessed, and the content (or absence of content) is checked. The path through the questionnaire is determined based upon the information in the save array field; and

c) as elements in equations and calculations. These produce new pieces of information that may be incorporated later in the instrument.

When used in a question text, save arrays are similar to the text fills used in PAPI interviews (a paper and pencil interviewing method used in previous NLS age cohort studies). These text fills indicated that the interviewer should substitute a given word or phrase into the question at the time of the interview so it read correctly. For example, in a printed PAPI questionnaire one would often see “Since (DATE OF LAST INTERVIEW) have you...”; this phrase would instruct the interviewer to insert the actual date for a given respondent. However, correctly inserting such text fills was the job of the interviewer and often involved flipping between pages.

One immediate difference in the CAPI questionnaires is that there are far more text fills, and most of them are automated or handled by the computer. Some CAPI text fills are identical to those used in the PAPI interviews, such as “he/she” to handle gender fills. For date-related text fills, the system substitutes a previously supplied date for the descriptive text specifying which date is needed.

In this questionnaire, text fills that refer to a save array are represented by bracketed text describing what piece of information is substituted in the interview. Although the interviewer never sees this bracketed text, researchers can use that information to follow the flow of the interview.

CAPI (YOUTH QUESTIONNAIRE VERSION  01/03/1997  8:00 AM)

Lead In: None.
Default Next Question: YINF-600

[YINF-600]
(INTERVIEWER READ TO R:) The computer has determined that you are eligible to participate in our study. Before we begin the interview, let me tell you some important information about this study. This study is sponsored by the U.S. Department of Labor, Bureau of Labor Statistics, under authority of Title 29 USC 2. Your participation is vital to the success of the study and is voluntary. This survey is conducted to understand the labor market experience of young adults. This information will be used by BLS and other researchers. The information you provide is protected under the Privacy Act. Personal identifiers, (e.g., name, address, or Social Security number) will be held in confidence and will not be released to the public.

Default Next Question: YCPS-2100
Next, we need to ask you some work-related questions. This section is made up of the same questions that are used to determine the national unemployment rate. The information gathered here will be compared to the national data.

Are you now in the active Armed Forces?

1 Yes (Go To YSCH-400)
0 No

I am going to ask a few questions about work-related activities LAST WEEK. By last week I mean the week beginning on the Sunday before (this/this past) Sunday and (this/this past) Saturday.

Does anyone in this household have a business or a farm?

1 Yes (Go To YCPS-2700)
0 No

Is the business or farm owned by you ALONE, does someone else in your household own it WITHOUT YOU, or do you own it with someone else in your household?

1 R’s only
2 R’s and others in the household together
3 Others in the household, without R

What is the main reason you were not looking for work during the LAST 4 WEEKS?
(INTREVIEWER: DO NOT READ LIST.)

1  BELIEVED NO WORK AVAILABLE IN LINE OF WORK OR AREA
2 COULDN'T FIND ANY WORK
3 LACKS NECESSARY SCHOOLING, TRAINING, SKILLS OR EXPERIENCE
4 EMPLOYERS THINK TOO YOUNG OR TOO OLD
5 OTHER TYPES OF DISCRIMINATION
6 CHILD CARE PROBLEMS
7 FAMILY RESPONSIBILITIES
8 IN SCHOOL OR OTHER TRAINING
9 ILL-HEALTH, PHYSICAL DISABILITY
10 TRANSPORTATION PROBLEMS
11 OTHER (SPECIFY)

Lead In: YCPS-27200[Default]
Default Next Question: YCPS-27400

Did you look for work at any time during the last 12 months?
1 Yes  (Go To YCPS-27700)
0 No

Did you actually WORK at a job or business during the last 12 months?
1 Yes  (Go To YCPS-27800)
0 No

Did you do any of this work during the last 4 weeks?
1 Yes  (Go To YCPS-30400)
0 No

And since you LEFT that job or business, have you looked for work?
1 Yes  (Go To YCPS-28000)
0 No
LAST WEEK, could you have started a job if one had been offered?

1 Yes  (Go To YCPS-30400)
0 No

Why is that?

1 OWN TEMPORARY ILLNESS
2 GOING TO SCHOOL

((age of R at date of interview) >= 14); /* is youth 14 years or older? */

1 Condition Applies
0 Condition Does Not Apply: Go To YEMP-107700

YTIM-700[Default] YTIM-1100[Default]

Default Next Question: YEMP-300

[YEMP-300]

We would like to talk to you about any work you have done in the time since your fourteenth birthday, that is since [youth’s 14th birthday]. In answering these questions, please tell us about any paid employment you had, or any work you did for a family business (whether or not you were paid). While we discuss these jobs, I will be marking them on this calendar. Later I will give you this calendar to help you remember important dates over the last few years.

(INTERVIEWER: DRAW A VERTICAL LINE THROUGH THE WHOLE CALENDAR IN THE CURRENT MONTH. ALSO DRAW A VERTICAL LINE THROUGH THE CALENDAR IN THE MONTH OF 14th BIRTHDAY, [date]. LABEL THIS AS 14th BIRTHDAY.)

We are going to discuss two sorts of jobs with you. We’ll call one type working as a freelancer or being self-employed: that is doing one or a few tasks for several people and not having a "boss" (for example, babysitting or mowing lawns) or working for yourself (for example, running a business).

We’ll refer to the second type as working as an employee: that is you had an on-going relationship with a particular employer (for example, working in a supermarket or restaurant, or being in the military). FIRST we will be asking ONLY about jobs on which you were working as an employee. Later we will ask about jobs on which you were working as a freelancer.

Default Next Question: YSAQ-272

[YSQA-257]

Now we are going to mention some ways men and women sometimes act toward each other. The following questions refer to the parents or parent figures with whom you are currently living. For many young people, these parent figures are also their biological parents. First we will ask you questions about how your mother or mother figure acts toward your father or father figure. Then we will ask you the same questions about how your father or father figure acts toward your mother or mother figure.

Lead In: YSAQ-255[Default]
Default Next Question: YSAQ-258

[YSQA-258]

To begin, please tell us how often your mother figure acts toward your father figure in the following ways.

Lead In: YSAQ-257[Default]

   1  Condition Applies
   0  Condition Does Not Apply : Go To YPIA-100

Default Next Question: YEXP-200

[YEXP-200]

Each of the next set of questions will ask you for your best guess at the chance that something will happen in the future. You can think of the PERCENT CHANCE that some event will occur as the number of CHANCES OUT OF 100 that the event will take place. If you think that something is impossible, consider it as having a 0 percent chance. If you think the event is possible but unlikely, you might say there is a 3 percent chance or a 15 percent chance. If you think the chance is pretty even, you can say there is a 46 percent chance or perhaps a 52 percent chance. If you think the event is likely, but not certain, you might say there is a 78 percent chance or a 94 percent chance. If you think it is certain to happen, give it a 100 percent chance. Just to make sure that you are comfortable with the scale, I'd like you to do a few practice questions, and explain your answer to me.

Was anyone else present during any portion of the youth interview, not just walking through the area where the interview was being administered, but listening in or taking part in the interview itself?

1 Yes  (Go To YIR-700)
0 No

Who was present?  (SELECT ALL THAT APPLY.)

1 Parent
2 Friend
3 Children
4 Other relative
5 Other

Where was the youth interview conducted?

1 Immediately outside the respondent's home, standing
2 Immediately outside the respondent's home, sitting
3 Inside the respondent's home
4 In the interviewer's car
5 At another location

How well kept is the exterior of the housing unit where the youth respondent lives?

1 Very well kept / cared for
2 Fairly well kept but some evidence of needed repairs
3 Poorly kept

How well kept is the interior of the home in which the youth respondent lives?

1 Very well kept / cared for
2 Fairly well kept but some evidence of needed repairs
3 Poorly kept
4 Cannot determine
Does youth respondent live with adult respondent?
1 Yes (Go To YIR-1600)
0 No

[YSIR-1200] R05196.00
How would you describe the immediate area or street (one block, both sides) where the youth respondent lives?
1 Rural and agricultural
2 Rural and residential
3 Suburban, residential
4 Suburban, mixed residential and commercial
5 Urban, residential only
6 Urban, mixed residential and retail commercial properties
7 Urban, mixed residential and wholesale or manufacturing or industrial
8 Buildings used for churches, golf course, park, schools, cemetery
9 Vacant buildings / vacant lots
10 Other (specify)

[YSIR-1300] R05197.00
What type of residence is most common on the street (one block, both sides) where the youth respondent lives?
1 detached single-family house
2 mobile home / trailer
3 single-family row house or town house, with two or more units side by side
4 small single-family apartment or condominium, with at least three stories
5 large apartment complex
6 apartment attached to or above commercial structure
7 campus setting
8 other institutional setting
9 military barracks
10 other

[YSIR-1400] R05198.00
How well kept are most of the buildings on the street where the youth resident lives?
1 Very well kept / cared for
2 Fairly well kept but some evidence of needed repairs
3 Poorly kept

[YSIR-1500] R05199.00
When you went to the your respondent's neighborhood/home, did you feel concerned for your safety?
1 Yes
0 No

[YSIR-1600] R05200.00
Did you have any problems conducting this interview?
1 Yes (Go To YIR-1700)
0 No
Describe the problem.
