

Child Health

Research based on the NLSY79 Child Surveys

The **NLSY79 Child** surveys, started in 1986, collect information on the growth and development of the children of the mothers in the National Longitudinal Surveys of Youth/1979 Cohort. This bibliography lists published studies from 2000-2011 based on the NLSY79 Child data that are related to child health. The document does not include dissertations or research on prenatal or postnatal care based exclusively on data from the mothers' reports in the NLSY79 main Youth. A comprehensive, annotated listing of research on all the National Longitudinal Surveys can be found at: <http://www.nlsbibliography.org>.
