

## Attachment 100: Census Bureau State and County Codes

### Alabama through Iowa

The tables in this document list the counties (and independent cities, if applicable) for individual states listed alphabetically from Alabama through Iowa, providing coding information for the county variables included on the NLSY97 Geocode CD. These variables use the current Federal Information Processing Standards (FIPS) codes (2000 Census codes presented, with notes identifying changes from the 1990 codes used in rounds 1-7 of the NLSY97).

#### 02 Alaska (AK)

Alaska's official political units are called boroughs. There are 10 organized boroughs and an unorganized borough. Unfortunately, for statistical purposes, the organized boroughs cover only a very small percentage of the land area of the state and have the further disadvantage of excluding military and Indian reservations which lie within their boundaries. Consequently, the unorganized borough is too large to provide a basis for suitable statistical analysis.

The Census Bureau, in conjunction with the State of Alaska, has established Census divisions for Alaska which provide a more effective basis for statistical purposes. The Census divisions are

stable geographic statistical areas with defined boundaries that encompass the entire state and generally comprise the election districts. The State of Alaska has requested that these Census divisions be utilized for statistical purposes. Following this recommendation, the software employed in producing the geocodes uses the Census areas rather than the boroughs.
