

Round 3 Errata

Corrections and Changes to the NLSY97 Data Release Round 3

Last updated 01/10/2002

A) Errors in the R3 event history

Incorrect codebook codes - ASVAB data

B) Changes between R3 main file release and R3 event history release

1) Parent age variable - round 1

2) Household Roster Changes - round 1

3) Nonresident Roster Changes

4) Created Variable Changes due to Household Roster and Nonresident Roster Changes

5) School Roster Changes - rounds 2 and 3

6) MILCODE and MILFLAG variables - rounds 2 and 3

7) Changes to employment created variables

C) Changes between R2 event history release and R3 event history release

1) Youth Roster variables - round 1

2) Parent Family Background Mark All that Apply Questions - round 1

3) Merging of Parent data into Youth respondent data record - round 1

4) School Roster Changes - round 2

D) Geocode variables

E) Corrections between the round 3 main and round 3 event history releases

F) Corrections between the round 2 event history and round 3 event history releases

G) Event History changes

H) Variables added to the NLSY97 data since the round 3 main release

I) Round 1 and round 2 variables added to the NLSY97 since round 2 event history release

J) Variables that have been dropped from the NLSY97

A) Errors in the R3 event history release to be corrected in the R4 main file release

1) Incorrect codebook codes - ASVAB data

The codebook codes for ASVAB_AVG_GRADE_REC are incorrect. The label 'Mostly As' is currently paired with the value of 8 but it should be paired with the value of 1; the value of 8 should have been paired with the label 'Mostly below Ds'. The label 'Half As and Bs' is currently paired with the value of 7 but should be paired with the value of 2; the value of 7 should have been paired with the label 'Half Cs and Ds'. Thus, the values are correct, but users will need to correct the label until the next CD comes out.

B) Significant changes made between the R3 main file release and R3 event history release

1) Parent age variable - round 1

This variable saves the date at which the responding parent turns 18. The months that were previously set to zero have now been set to -3. Listed below are the affected variable and the affected number of cases.

R0593000 P3-100_M 54 cases

2) Household Roster Changes - round 1

A substantial number of changes have been made to many of the round 1 Household roster variables. Most of these changes have involved recoding missing information from a zero to a -4 (valid skip). A much smaller number of changes have been made where discrepancies have been found between Household Roster information and Nonresident roster information, particularly in respect to the duplication of persons on these rosters. Most of the invalid duplication of persons has occurred on the Nonresident roster, but we have also found it necessary to remove a small number of duplicate persons from the Household roster. Listed below are the affected variables and the affected number of cases.

3) Nonresident Roster Changes - rounds 1 through 3

A substantial number of changes to the nonresident roster variables have been made to achieve three main purposes: 1) to eliminate duplicate persons from the roster; 2) to correct information that was wrong in earlier versions; and 3) to add information which was previously missing from the roster but which did exist in the original "raw" screener questions. Listed below are the affected variable and the affected number of cases.

4) Created Variable Changes due to Household Roster and Nonresident Roster Changes

Updates to the round 1 household and nonresident rosters led to the following changes in the created variables. Listed below are the affected variables and the number of cases.

R1200100	CV_BIO_MOM_AGE_CHILD1	17 cases
R1200200	CV_BIO_MOM_AGE_YOUTH	6 cases
R1205300	CV_YTH_REL_HH_CURRENT	4 cases
R1302400	CV_HGC_BIO_DAD	466 cases
R1302500	CV_HGC_BIO_MOM	93 cases

R2563600	CV_YTH_REL_HH_CURRENT	40 cases
R3885200	CV_YTH_REL_HH_CURRENT	72 cases

5) School Roster Changes - rounds 2 and 3

A review of the R2 and R3 schooling data uncovered a number of errors in the SCHCODE, INTERVIEW, and PUBID variables. These problems have been corrected in the latest release. Listed below are the affected variable and the affected number of cases.

R2463300	NEWSCHOOL_SCHCODE.01	106 cases
R2463400	NEWSCHOOL_SCHCODE.02	33 cases
R2463600	NEWSCHOOL_SCHCODE.04	4 cases
R2463700	NEWSCHOOL_SCHCODE.05	1 case
R2463900	NEWSCHOOL_INTERVIEW.01	119 cases

R3778900	NEWSCHOOL_PUBID.02	34 cases
R3779000	NEWSCHOOL_PUBID.03	8 cases

The following created variables were updated to reflect changes in the School Roster between the round 3 main and the round 3 event history release:

R2569800	CV_SCH_ATTEND_EVER	5 cases
R2569900	CV_SCH_ATTEND_YR	4 cases
R2600100	CV_SCHOOL_SIZE	33 cases
R2600200	CV_STUDENT_TEACHER_RATIO	33 cases
R3891800	CV_SCH_ATTEND_EVER	109 cases
R3891900	CV_SCH_ATTEND_YR	98 cases
R3923500	CV_SCHOOL_SIZE	206 cases
R3923600	CV_STUDENT_TEACHER_RATIO	206 cases

In addition, the round 2 variable titles CV_HGC_EVER and CV_HGC_YEAR were reversed before the in the round 3 event history release; these titles were attached to the correct data in the in the round 3 event history release.

6) MILCODE and MILFLAG variables - rounds 2 and 3

A review of the employment data revealed that a combination of technical errors and interviewer confusion were contributing to the underreporting of military jobs. Corrections have been made to the MILCODE and MILFLAG variables which will both add valid data to the variable and establish a consistency between the use of the 0 code for non-military jobs and the -4 code for valid skips. Listed below are the affected variable and the affected number of cases.

R2469900	YEMP_MILCODE.01	530 cases
R2470000	YEMP_MILCODE.02	393 cases

7) Changes to employment created variables

A number of updates were made to the employment created variables between the round 2 event history release and the r3 main release and the r3 event history release. These updates were due to (1) updates made to the employment programs to reflect the change in the way that dates are imputed (2) updates to the military code information in the employer roster and (3) a coding problem that caused other specify variables to be coded incorrectly. Rather than listing each round's changes separately, a complete list of all updates is below:

2) Parent Family Background Mark All that Apply Questions - round 1

Some problems were detected that occurred while integrating the other (specify) coding data into some of the mark all that apply questions concerning parent languages and origins. Corrections were made to a number of categories within each of these questions. Listed below are the affected variable and the affected number of cases.

3) Merging of Parent data into Youth respondent data record - round 1

Some omissions and errors were detected that involved the merging of parent data into the youth respondent data record. These problems occurred mainly in households that contained multiple youth respondents who had different sets of parents. The problems were limited primarily to the information concerning the background and characteristics of the non-responding biological parent(s). Listed below are the affected variable and the affected number of cases.

D) Geocode variables

Updates were made to the geocode process that included a switch to using Maptitude software and a change in the definition of Urban/Rural to include Urbanized Areas. The following main file variables were updated to reflect these changes:

R1200300 CV_CENSUS_REGION 132 cases
R1210400 CV_MSA 1170 cases
R1217500 CV_URBAN-RURAL 2088 cases
R2558800 CV_CENSUS_REGION 10 cases
R2569500 CV_MSA 793 cases
R2576800 CV_URBAN-RURAL 1382 cases

In addition, the round 1 through round 3 information on the geocode variables were updated and remerged with the 1994 County-City Data book to update the county level information presented on the geocode CD.

E) A small number of corrections have been made to the following variables between the round 3 main and round 3 event history releases.

G) Event History changes

A number of updates were made to the event history variables. These updates reflect the normal addition of information from the present round, as well as changes to the underlying data listed in these errata. The major changes due to error updates are described below.

The schooling event history arrays were rerun to reflect changes to all rounds of the NEWSCHOOL roster; the created school ids previously used in the arrays were also replaced with ids from the NEWSCHOOL roster so that users could more easily link to school-specific raw data. In addition, the programs that create these arrays were amended to more accurately account for time not enrolled.

All employment event history arrays were updated to reflect changes previously agreed to in the NLSY97 design meetings. These changes included updating the missing values in the employment and gap dates to reflect the values used in the CAPI program and assigning a missing value code for missing month and/or year data. The programs were also updated to take account of the full range of dates when determining which weeks would be assigned a missing value. Finally, the round 2 and round 3 arrays were rerun to reflect changes to the military variables.

H) The following variables have been added to the NLSY97 data since the round 3 main release.
