Introduction

This document describes the content of the 2002 Child Supplement to the National Longitudinal Survey of Youth/1979 Cohort. This data collection instrument, designed to obtain information about the biological children of the female NLSY79 respondents, was administered as a computer-assisted interview. Although some cases were done over the telephone, the dominant interview mode was in-person; thus the term CAPI (computer-assisted personal interview) is used to refer to the data collection technology. From 1986-1992, this supplement was administered using paper and pencil (PAPI) methods, and researchers could determine the interview content by examining the printed questionnaire and other interviewing materials.

The aim here is to reproduce the content of the CAPI interview in a clear, complete, and compact format. With this in mind, this CAPI questionnaire has been formatted as similarly as possible to a conventional questionnaire, but it also includes additional information that enhances the usefulness of the questionnaire for data users. The resulting document summarizes the “conversation” between the interviewer and respondent. The term “conversation” is chosen to emphasize the difference between the questionnaire and the codebook. The codebook contains the data released as a result of the interview, but some information collected during the interview is not present in the codebook. For example, the questionnaire includes questions for which the responses might somehow identify the respondent. Such items are not released, so the related questions are not present in the codebook. Conversely, the codebook contains some information not directly collected in the interview. For example, while created variables are documented in the codebook, there is no reference to them in the questionnaire as they are not part of the interaction between interviewer and respondent.

In order to simplify the questionnaire and the public use data file, a number of time variables, from which elapsed time can be calculated (time stamps), have been omitted. Elapsed time may be very useful for a variety of methodological studies. Users interested in these data are encouraged to contact NLS User Services at CHRR for additional information.

To aid researchers in using the questionnaire, this introduction provides information on several topics. First, typical question records are described and key terms such as “Question Name,” “Distribution Code Block,” and “Lead in Questions” are defined. This section explains how to follow the flow of the interview through the questionnaire. Second, instrument compression techniques used to produce a compact questionnaire are discussed and elsewhere noted where appropriate. Finally, an overview on how the CAPI child assessments are presented in this questionnaire is included.

Question Records

Question records are the building blocks of the CAPI questionnaire, with various types of records performing different data collection and/or manipulation functions. Loosely grouped, CAPI question records will either: (a) provide administrative information that assists the interviewer or provides an introduction to the next question; (b) provide question text and control for data entry of the response; or (c) perform internal operations and calculations to guide the interview and maintain the internal data storage during the interview. Question records essential to understanding either the content of the survey or the flow of respondents through the interview appear within the Child Supplement questionnaire.

The Child CAPI questionnaire contains some elements found in the NLSY79 Child/Young Adult data set codebook. For example, skip patterns are included in each question block. However, many of the elements not essential to understanding the conversational flow of the interview have been removed from the questionnaire, making each question block less cluttered and easier to read. In particular, automated functions transparent to the interviewer, but crucial to understanding the flow of the questionnaire, have been "translated" into a text format that captures the gist of the computer instruction code.

Figure 1 shows the format of a typical question record as used in this document; the various information fields are then explained in the following paragraphs.

Figure 1. CAPI Question Record

QUESTION NAME

In the Question Text block, conventional text indicates what the interviewer reads aloud to a respondent.

AN INSTRUCTION OR COMMENT TO THE INTERVIEWER IS CAPITALIZED.

AUTOMATED CAPI OPERATIONS SUCH AS TEXT FILLS (ChildName, he/she), AND SKIPS OR BRANCHES (GO TO HLTH-99) ARE ALSO CAPITALIZED.

(CODING INSTRUCTIONS TO THE INTERVIEWER APPEAR HERE)

K₁ response/answer choice 1 (*GO TO HLTH-98*)
 K₂ response/answer choice 2
 K₃ response/answer choice 3 (*GO TO HLTH-99A1*)

.

.

.

K_n distribution code block text

(*NUMERIC EVALUATIONS AND SKIPS MAY APPEAR HERE*)

Default Next Question:

Lead In(s):

Question Name

Question names are the unique identifiers assigned to identical questions across CAPI survey years. They replace the deck-and-column numbering system used in previous survey rounds. Subsequent CAPI surveys that field this question will use the same question name to help identify comparable questions across years.

Question names provide several items of information. The question name generally indicates the section of the instrument from which each question was derived—e.g., question names beginning with SCHL come from the section of the Child Supplement questionnaire regarding the child's schooling. The HLTH series designates the child health questions. Additionally, the question name indicates the order in which the question was administered within each section.

Embedded in some question names is an indicator that the question was part of a “looped” or repeated series. For example, the “.01” in question HLTH-6C.01 indicates it is the first iteration of a question asking about accidents or injuries that a child may have had; HLTH-6C.02 is the second iteration of the same question, but for the next most recent accident or injury; HLTH-6C.03 is the third most recent accident, and so on. *For the sake of brevity, only the first question of a looped series is shown in the questionnaire.* All replications of a looped question variable that contain data *are* included in the codebook.

Question Text

The “Question Text” field contains the text of the question that the interviewer asked the respondent or other information used to direct the flow of the interview. Machine instructions often appear in text read by the interviewer. For example, the name of the child being interviewed is stored in a variable, or save array, called [*Child Name*] for use during the interview. Each time a question refers to the child by name, the computer automatically inserts the name of the child into the question. The interviewer never actually sees the text “[*Child Name*]” on the screen, only the child's actual name. Some CAPI text fills are similar to those used in the PAPI interviews, such as [*he/she*] to handle gender fills. The following types of text may appear:

Question Text:	Text that is read aloud to the respondent--question or information-- appears in a conventional mixture of upper and lowercase letters.
<i>AUTOMATION:</i>	If a question record contains a machine instruction that is executed automatically, text representing that instruction is capitalized. Upper case indicates a machine instruction that is important to skip logic, but is not seen by the interviewer. To reiterate, only a reduced form of the machine instructions is printed in lieu of computer code in this document.
INTERVIEWER COMMENTS	Text in all uppercase is either an instruction to the interviewer or a clarifying comment for data-users. NORC interviewers do not see these items.

Distribution Code Block

When a question requires the choice of one or more items from a predefined list, that list, or distribution code block, is shown in the question block. Each item in the distribution code block has three components:

Code:	The numeric code associated with each possible response is listed first (shown in Figure 1 as K_{1...n}). All data in the NLSY79 public use data files are numeric, so each possible item that could be selected is associated with an integer.
Text:	Next is the item text or description associated with the numeric code, such as "Yes" or "No" or "Very Satisfied".
Skip:	When the selection of a specific response determines which question will be asked next, a (<i>GO TO Question</i>) notation follows the text of the response set.

Some questions collect numeric data (hours, weeks, dollar amounts, etc.) or verbatim text. In these cases, spaces or blank lines appear indicating where digits or lines of text were to be entered. Whenever the next question to be asked depends upon an entered numeric value falling in some range, the corresponding evaluation and machine instructions are shown.

Lead-ins

When using PAPI questionnaires, researchers needed to study the instrument in detail to determine under what circumstances a particular question was asked. The CAPI questionnaire simplifies this process somewhat by including a "Lead in(s)" fields in the question block. This field lists the questions that lead into each particular item.

Examples:

CS-99 [Default]	This means that the default path from question CS-99 lead to the current question, but there may be conditions under which a different path would be taken.
CS-99 [1:4]	This means that whenever the response category for question CS-99 takes on the values one to four (inclusive), the next question will be the current question record. If the response to CS-99 is some other value, the respondent may next be asked a different question.
CS-99	When the lead in question is shown without a qualifier such as [Default], or [1:4], this is a sign that records not essential to understanding the flow of the instrument have been suppressed. In such cases, if the user refers back to the lead in question, this earlier question will clarify the flow of the interview.

By tracing the skip pattern backward, one may determine the universe of respondents asked a given question. This universe information is a new feature not present in the documentation for paper and pencil interviews.

Default Next Question

This field specifies the question to be asked next unless another skip specification in the distribution code block applies. If “Default Next Question” is omitted from the question record, the next question in the questionnaire is the default.

Save Symbols

The term “Save Symbol” indicates a piece of information that is stored for later use by the CAPI instrument. The information is stored in a save array and referenced by its save array name, or *symbol*, in CAPI questions and machine instructions. The information stored in save arrays is used:

- a) as part of the text of a survey question (e.g., the child’s first name is automatically inserted into question text wherever the symbol [Child First Name] is referenced).
- b) to govern paths through the questionnaire by comparing the stored information with some other information or condition. Branching is based on whether the comparison condition—or which of several conditions—is evaluated as true or false.

- c) as part of a computation that creates new information, stored for later use in the instrument.

Hard and Soft Limits

Hard or soft limits may be applied for any numeric entry question, typically those items asking “How much...”, or “How many...”. “HardMax” and “HardMin” values indicate the absolute upper and lower limits to numeric entries that are accepted for these questions. The CAPI instrument will not accept an answer input that is outside of these limits, and prompts the interviewer to enter a valid numeric response. “SoftMax” and “SoftMin” fields indicate thresholds beyond which entries are deemed *unusual* for that question. When a numeric entry is outside a soft limit, a prompt appears on-screen indicating that the value entered is rather unusual for that question. Interviewers then have the choice to enter a different value, or retain the current value as correct. Hard and soft limits may also be declared dynamically, referencing values in a save array. In such cases, the referenced symbol appears in lieu of a number.

Instrument Compression

In order to provide a more compact questionnaire, two types of records have been dropped. The following do not appear within this questionnaire: (1) iterations of “looped” questions or repetitive series, and (2) question records that perform internal operations not necessary for understanding the conversational flow of the survey.

First repetitions of questions that are asked multiple times are not included. Users can readily identify such repeated “loop” question series beginning and ending with items named LOOP-BEGIN and LOOP-END respectively. Although repetitions are not printed in the questionnaire, they do appear in the codebook and have names that end in “.01” to indicate the first iteration, “.02” to indicate the second iteration, etc. Questions that have been dropped because they are replications will, occasionally, appear in lists of lead-in questions or branching instructions. Unless noted in the questionnaire, the number of iterations of a looped question or series was not limited.

Graphic Display of Child Assessments

With the exception of information added to help understand the flow of the instrument, the question records in this document present what interviewers saw on the computer screen during most of the Child Supplement CAPI interview. Capturing the flow of the child assessments included in the interview, however, presents somewhat more of a challenge. The PIAT and PPVT assessments in particular rely on visual media (such as flip charts) as part of the assessment. The Child Supplement CAPI instrument presents such graphics to the interviewer. A question-by-question graphical presentation, accompanied by appropriate skip instructions, would be more true to the interviewers' experience, but voluminous. Thus, much of the more compact, original PAPI format of the child assessment sections has been retained in Appendix B of this document. A sample of typical screens from each assessment is included in Appendix C. Text conventions used throughout the rest of the questionnaire are used in the assessment section wherever possible. Please note: children are still shown the official item plates for the PIAT and PPVT assessments and do not view the laptop screens seen by the interviewer.

Changes in the Child CAPI Supplement

Mother Report. The mother-report assessment items for children under age 4 that were moved from the Mother Supplement to the Child CAPI instrument in 2000 are now back in the Mother Supplement. In 2002 the Mother Supplement also became a CAPI questionnaire, administered on laptop. Thus, in 2002 the HOME, How My Child Usually Acts (Temperament), Motor and Social Development, and the Behavior Problems Index appear in the Mother CAPI Supplement for all children.

Child Background. In 2002 virtually all the child background questions directed to the mother have been moved to the Mother Supplement. The only items left in the "Preliminaries" section of the CS are age and grade verification and consent to assess.

Child Schooling. Questions about the child's most recent classroom experiences and homework are now directed to children age 8 and older.

Work for Pay & Religion. Questions about jobs and religious affiliation that were in the Child Self-Administered Supplement (CSAS) for children 10-14 were moved to the Child Supplement and are administered to the child by the interviewer.

Other Documentation

Two additional instruments are used in the NLSY79 Child survey: (1) the *Mother Supplement*, containing maternal reports on the home environment, behavior problems, and child temperament, and (2) the *Child Self-Administered Supplement* (CSAS) for children 10 and over. These supplements are available at the BLS NLS website (<http://www.bls.gov/nls/nlsy79ch.htm>). Users interested in interviews with the children age 15 or over (the NLSY79 Young Adults) should consult the 2002 *Young Adult CAPI Questionnaire*.

Information about the NLSY79 Child and Young Adult data or additional documentation is available from: <http://www.bls.gov/nls/nlsy79ch.htm> or

Appendix A:
HOME Observations
Help Records

NLSY79 Child HOME Observations Help Records

In the computer assisted CAPI NLSY79 Child Supplement, interviewers have access to instructions that guide them in the administration of the electronic questionnaire. These “help” screens replace the traditional hardcopy question-by-question instructions that typically accompany a paper and pencil interview schedule.

The help screens (records) listed below are physically linked to the HOME Observation questions in the CAPI questionnaire for the NLSY79 Child survey. These help records are electronically available to the interviewer during the administration of the CAPI instrument.

For each help screen below, the Question Name appears to the left and a brief explanation of the question to the right. A substantive instruction, adapted directly from the HOME manual as prepared by the designers of the original instrument, appears in each record block. Only help records actively linked to the HOME section of the Child CAPI questionnaire are contained in this list.

NOTE: General interviewer instructions on the administration of each of the Child assessments appear on screens directly preceding the CAPI sections containing the assessments.

NLSY79 Child HOME Observations Help Records

HELP-CSOB-2A Title: HOME: Mom spontaneously spoke to child twice or more.

MOTHER SPONTANEOUSLY VOCALIZES TO CHILD AT LEAST TWICE DURING THE VISIT (EXCLUDING SCOLDING). "Vocalizes" refers to any sound or words emitted by the mother. For example, she may say, "S-s-s-" or "Sweet baby," or any random words or sounds. In order for this item to be coded "yes", the mother's vocalizations must have occurred spontaneously as opposed to having occurred in response to some vocalization by the child.

HELP-CSOB-3A Title: HOME: Mom responded verbally to child's speech.

MOTHER RESPONDS TO CHILD'S VOCALIZATIONS WITH A VOCAL OR VERBAL RESPONSE. Again the maternal response may be either a complete word or words or merely clearly differentiated sounds, e.g., "ta-ta"; "tsk-tsk," or "You talking to Mommy?" The key factor here is that the mother is responding to the child's vocalization, not ignoring it. If the child does not vocalize during the interview, thereby denying the mother an opportunity to respond, the score would still be "no."

HELP-CSOB-4A Title: HOME: Mom caressed, kissed, hugged child at least once.

MOTHER CARESSES OR KISSES CHILD AT LEAST ONCE DURING THE VISIT. "Caresses" include a hug, a stroke of the hair, patting an arm or leg, reaching out affectionately and touching the face, etc. Blowing a kiss as well as actually establishing physical contact may be counted as a kiss.

HELP-CSOB-5A Title: HOME: Mom slapped/spanked child once or more.

MOTHER SLAPS OR SPANKS CHILD DURING THE VISIT. Occasionally a visitor will feel that she does not know whether a mother is playing or seriously slapping or spanking a child. The best guide to use in such instances is the child's behavior. If the child reacts with pleasure or happiness, chances are this represents a style of positive interaction between him and his mother. This case would be coded "no", - did not slap or spank. If he frowns, looks unhappy, whimpers, or cries, you can feel pretty confident that, however the mother intended it, the child did not perceive it as pleasurable.

HELP-CSOB-6A Title: HOME: Mom interfered with child's actions more than 3 times.

MOTHER INTERFERES WITH CHILD'S ACTIONS OR RESTRICTS CHILD'S MOVEMENT MORE THAN THREE TIMES DURING THE VISIT. Restrictions and interference here refer to such things as: taking a toy away from a child; putting a child who has climbed up on the sofa back down on the floor; putting a child who is crawling around the floor into a playpen or crib; slapping a child as he starts to pick up the visitor's handbag. In the last instance, the item would be applicable to item CSOB-5A. The Restrictions may also be verbal--"Stop that"; "Get out of there." Do not code as interference any action taken to prevent the child from harming himself (e.g., running into the street).

HELP-CSOB-7A Title: HOME: Mom provided toys or interesting activities.

MOTHER PROVIDES TOYS OR INTERESTING ACTIVITIES FOR CHILD DURING THE INTERVIEW. In order to be credited on this item, the mother must make some special effort to see to it that the child has something interesting to do during the time she will be talking to the interviewer. If the interview is conducted in a room that contains a number of toys or the child's toy box, one should assume that the mother has taken special efforts to have something available to entertain the child during the interview. If, however, the child tires of what is available and begins to whimper or to ask for something to do, this item should not be coded "yes" unless at that time the mother makes some special effort to bring out a new toy or do something else to interest the child.

HELP-CSOB-8A Title: HOME: Mom kept child in view/looked at child often.

MOTHER TENDS TO KEEP CHILD WITHIN VISUAL RANGE AND TO LOOK AT HIM OFTEN. "Often" means frequently enough to ensure safety of the child and to keep some kind of interpersonal contact with him -- the sort of thing lovers do when in the same room but out of reach of one another.

HELP-CSOB-9A Title: HOME: Child's play environment is safe.

THE CHILD'S PLAY ENVIRONMENT APPEARS SAFE AND FREE OF HAZARDS. The interviewer should use her own good judgment in scoring this item. Examples of hazards are: broken glass lying around, furniture with obvious wood splinters, an uncovered rotary fan, boards with nails sticking out, unprotected stairs for a pre-walking baby, a house so close to the street that a child could not safely play in the yard, pot handles extending over edge of the stove, etc. Overcrowding or clutter would not count as a hazard unless it existed to the extent that it could injure the child.

HELP-CSOB-2B Title: HOME: Mom conversed with child at least twice.

MOTHER CONVERSES WITH CHILD AT LEAST TWICE DURING VISIT (SCOLDING AND SUSPICIOUS COMMENTS ARE NOT COUNTED.) This item involves maternal conversation, not just vocalization which can be any sounds or words exchanged with the child. The mother must make an effort to converse with the child and ask questions, to talk about things, or engage in verbal interchange other than scolding or degrading comments.

HELP-CSOB-3B Title: HOME: Mom answered child's questions/requests verbally.

MOTHER ANSWERS CHILD'S QUESTIONS OR REQUESTS VERBALLY. In order to receive credit for this item the mother must make an effort to answer the question for the child. If the mother is unable to answer it at the moment she may tell the child she doesn't know but that they will look up the answer later. Responses such as "Mother's busy, go away" or "Don't bother me now" should be coded "no".

HELP-CSOB-4B Title: HOME: Mom kissed/caressed/hugged child at least once.

MOTHER CARESSES, KISSES OR CUDDLES CHILD AT LEAST ONCE DURING VISIT. This need not be a wild burst of showy affection. Simple signs of concern such as a mother gently tucking the child's shirt in, holding him on her lap, holding a hand, or a gentle pat on the shoulder would all receive a "yes."

HELP-CSOB-5B Title: HOME: Mom introduced interviewer to child by name.

MOTHER INTRODUCES INTERVIEWER TO CHILD. In many cases the child already knows the interviewer; however, the mother must still remind the child of the visitor's name. A formal introduction is not necessary for credit. A comment such as, "You remember Mrs. Jones, don't you?" or "Show Mrs. Jones the new book you got for your birthday" will receive credit. The object is for the mother to make the child aware of the visitor's name and the fact that she has come to visit both of them and not just the mother.

HELP-CSOB-6B Title: HOME: Mom physically restricted/grabbed child.

MOTHER USED PHYSICAL RESTRAINT, SHOOK, GRABBED, OR PINCHED CHILD DURING VISIT. In a younger child the mother might be apt to hold the child in her lap even though the child struggles to get down. An older child might be placed in a chair to keep him out of the way, or he might be jerked back for handling items on a table or pulled away if he tried to climb on the interviewer's lap.

HELP-CSOB-7B Title: HOME: Mom slapped/spanked child at least once.

MOTHER SLAPS OR SPANKS CHILD DURING VISIT. This item goes hand in hand with HELP-CSOB-6B. In this item the slaps and spanks must be in anger or as a reprimand for some wrongdoing. An affectionate pat on the bottom as the mother sends the child out to play does not mean a slap or spank.

HELP-CSOB-8B Title: HOME: Mom voice conveyed positive feeling about child.

WHEN SPEAKING OF OR TO CHILD, MOTHER'S VOICE CONVEYS POSITIVE FEELING. Is the mother pleased with her child? Does she enjoy her and talk about her in a pleasant, joyful manner or does she talk in a flat tone that communicates, "She's here, so I'll put up with her."

HELP-CSOB-9B Title: HOME: Child's play environment is safe.

CHILD'S PLAY ENVIRONMENT APPEARS SAFE AND FREE OF HAZARDS. (Not having any outside play area requires an automatic "no".) The interviewer should use good judgment on the scoring. Examples of typical building/home hazards are: plaster coming down from ceiling, stairway with boards missing, rodents, broken glass lying around, junk cars abandoned in the yard or along the side of the street, open ditches of a house so close to a street that a child could not safely play in the yard, and boards with nails sticking out of them.

HELP-CSOB-10B Title: HOME: Interior of home dark/monotonous.

THE INTERIOR OF THE APARTMENT OR HOME IS DARK OR PERCEPTUALLY MONOTONOUS. On this item the interviewer can take into account a lack of lighting, drawn drapes, a lack of pictures or plants, or a seeming lack of effort to dress the home up and make it attractive.

HELP-CSOB-11B Title: HOME: Rooms are reasonably clean.

ALL VISIBLE ROOMS OF THE HOUSE ARE REASONABLY CLEAN. The interviewer will have to use his or her own good judgment. Allowances should be made for differing styles of housekeeping. However, very dirty walls or an abundance of cobwebs should be coded "no." The interviewer should be able to sit on a chair or sofa without first having to clear a space to sit, and the floor should be relatively free of clutter or trash.

HELP-CSOB-12B Title: HOME: Rooms are reasonably uncluttered.

ALL VISIBLE ROOMS OF THE HOUSE ARE MINIMALLY UNCLUTTERED. The interviewer will have to use his or her own good judgment. Allowances should be made for differing styles of housekeeping. The interviewer should be able to sit on a chair or sofa without first having to clear a space to sit, and the floor should be relatively free of clutter or trash.

HELP-CSOB-2C Title: HOME: Mom encouraged child to converse.

PARENT ENCOURAGES CHILD TO CONTRIBUTE TO THE CONVERSATION DURING VISIT. This item should be scored "yes" if the parent actively encourages the child to say something or if the parent allows the child input into the conversation without discouragement.

HELP-CSOB-3C Title: HOME: Mom answered child's questions/requests.

PARENT RESPONDS TO CHILD'S QUESTIONS DURING INTERVIEW. In order to receive credit for this item the parent must make an effort to answer the question for the child. If the parent is unable to answer the question at the moment she may tell the child she doesn't know but that they will look up the answer later. Responses such as, "I'm busy, go away." or, "Don't bother me now." do not receive credit. If the child fails to ask a question during the interview, this item should be coded "no."

HELP-CSOB-4C Title: HOME: Mom conversed with child excluding scolding.

PARENT TALKS TO CHILD DURING VISIT (BEYOND CORRECTION AND INTRODUCTION). This item refers to conversation, not just vocalization. The parent must make an effort to converse with the child and ask questions, to talk about things, or to engage in verbal interchange other than scolding or degrading comments.

HELP-CSOB-5C Title: HOME: Mom introduced interviewer to child by name.

PARENT INTRODUCES INTERVIEWER TO CHILD. To receive credit for this item, parent should introduce the child to the interviewer by name and in some way identify the visitor for the child.

HELP-CSOB-6C Title: HOME: Mom voice conveyed positive feeling about child.

WHEN SPEAKING OF OR TO CHILD, PARENT'S VOICE CONVEYS POSITIVE FEELINGS. The intent of this item is to capture the feeling tone conveyed by the parent toward the child. Does the parent feel good about her child? Does she enjoy her and talk about her in a pleasant, joyful manner or does she talk in a flat tone which communicates, "She's here, so I'll put up with her."

HELP-CSOB-7C Title: HOME: Home is dark or perceptually monotonous.

THE INTERIOR OF THE APARTMENT IS DARK OR PERCEPTUALLY MONOTONOUS. On this item the interviewer can take into account a lack of lighting, drawn drapes, a lack of pictures or plants, or a seeming lack of effort to dress the home up and make it attractive.

HELP-CSOB-8C Title: HOME: All rooms are reasonably clean.

ALL VISIBLE ROOMS OF THE HOUSE ARE REASONABLY CLEAN. Allowances should be made for differing styles of housekeeping. However, very dirty walls or an abundance of cobwebs should be coded "no." The interviewer should be able to sit on a chair or sofa without first having to clear a space to sit, and the floor should be relatively free of clutter or trash.

HELP-CSOB-9C Title: HOME: All rooms are minimally cluttered.

ALL VISIBLE ROOMS OF THE HOUSE ARE MINIMALLY CLUTTERED. Allowances should be made for differing styles of housekeeping. However, the interviewer should be able to sit on a chair or sofa without first having to clear a space to sit, and the floor should be relatively free of clutter or trash.

HELP-CSOB-10C Title: HOME: Building has no dangers/health hazards.

BUILDING HAS NO POTENTIALLY DANGEROUS STRUCTURAL OR HEALTH DEFECTS (E.G., NO PLASTER COMING DOWN FROM CEILING, STAIRWAY WITH BOARDS MISSING, RODENTS, ETC.) Some of the most common concerns for this item are: open gas fires in the small home, and the presence of bleach, cleaning fluids, and other poisons within easy reach of a small child. Overcrowding or clutter in the home would not count as a hazard unless it is to such an extent that it could injure the child. A safe environment should be coded "yes."

Appendix B:

NLSY79 Child Supplement

Assessments Graphic Display

2004 NLSY79 CHILD SUPPLEMENT ASSESSMENTS

Graphic Display of Child Assessments

With the exception of information added to describe the flow of the instrument, the question records in the *Child Supplement* instrument document present what interviewers see on the computer screen during most of the *Child Supplement* CAPI interview. Capturing the flow of the child assessments included in the interview, however, presents somewhat more of a challenge. Some assessments, such as the PIAT Math and PIAT Reading Recognition subtests, rely on visual media (such as flip charts or “easels”) as part of the materials presented to the child. The interviewer views graphical representations of all the assessments on-screen. A question-by-question graphical presentation, accompanied by appropriate skip instructions, would be more true to the interviewers' experience, but voluminous. Thus, much of the more compact, original PAPI format of the child assessment sections has been retained in this document. A sample of typical screens from each assessment is included at the end of this document. Text conventions used throughout the CAPI questionnaire documents are used in this section wherever possible.

THIS PAGE INTENTIONALLY BLANK

What I Am Like

(Self-Perception Profile for Children)

AGES: CHILDREN 12 YEARS AND OLDER

(CALLED BY SPPC-EXEC OF CHILD SUPPLEMENT.)

INTERVIEWER: [IF NEEDED, READ TO MOTHER/GUARDIAN.]

This section is meant to give us an idea of how (CHILD) views *(him/her)*self.

INTERVIEWER: READ TO CHILD.

- A. All kids think and feel differently about things. We are interested in what you think you are like and how you think and feel. This is not a test. There are no right or wrong answers. Remember, all kids are different.

[HAND SPPC SHOWCARD TO CHILD] This Section is called "What I Am Like." Here's an example of how the questions work. I'll read the question aloud and you follow along and think about it before you answer. This question is about two kinds of kids and we want to know which kids are more like you.

- B. READ BOTH PARTS OF PRACTICE SENTENCE. EMPHASIZE THE UNDERLINED WORDS.

Some kids would rather		other kids would
<u>play outdoors</u> in their	BUT	rather <u>watch TV</u> .
spare time.		

- C. What you do is this: First, decide which kids are more like you -- the kids on the "X" side of the card (POINT TO "X" SIDE OF SHOWCARD) or the kids on the "Y" side of the card (POINT TO "Y" SIDE OF SHOWCARD).

IF NECESSARY, PROBE: Which kind of kid is more like you? The kid on the "X" side or the kid on the "Y" side of the card?

- D. POINTING TO ANSWER CATEGORIES ON SHOWCARD, SAY:

Now, think about the answer you just gave me and then decide if that is really true for you or only sort of true for you.

IF NECESSARY, PROBE: OK, what do you think? Really true or sort of true for you?

E. Okay, that was just for practice. Now let's do some more questions. Turn to the next card.

REALLY TRUE FOR ME	SORT OF TRUE FOR ME	X	Q#	Y	SORT OF TRUE FOR ME	REALLY TRUE FOR ME
4	3	Some kids feel they are very good at their school work.	1. BUT	Other kids worry about whether they can do the school work assigned to them.	2	1
1	2	Some kids are often unhappy with themselves.	2. BUT	Other kids are pretty pleased with themselves.	3	4
4	3	Some kids feel like they are just as smart as other kids their ages.	3. BUT	Other kids aren't so sure and wonder if they are as smart.	2	1
1	2	Some kids don't like the way they are leading their life.	4. BUT	Other kids do like the way they are leading their life.	3	4
1	2	Some kids are pretty slow in finishing their school work.	5. BUT	Other kids can do their school work quickly .	3	4
4	3	Some kids are happy with themselves as a person.	6. BUT	Other kids are often not happy with themselves as a person.	2	1
REALLY TRUE FOR ME	SORT OF TRUE FOR ME	X	Q#	Y	SORT OF TRUE FOR ME	REALLY TRUE FOR ME

REALLY TRUE FOR ME	SORT OF TRUE FOR ME	X	Q#	Y	SORT OF TRUE FOR ME	REALLY TRUE FOR ME
1	2	Some kids often <u>forget</u> what they learn.	7. BUT	Other kids can remember things <u>easily</u> .	3	4
4	3	Some kids <u>like</u> the kind of <u>person</u> they are.	8. BUT	Other kids often wish they were someone else.	2	1
4	3	Some kids do <u>very well</u> at their classwork.	9. BUT	Other kids <u>don't</u> do very well at their classwork.	2	1
4	3	Some kids are very <u>happy</u> being the way they are.	10. BUT	Other kids wish they were <u>different</u> .	2	1
1	2	Some kids have <u>trouble</u> figuring out the answers in school.	11. BUT	Other kids almost <u>always</u> can figure out the answers.	3	4
1	2	Some kids are not very happy with the way they do a lot of things.	12. BUT	Other kids think the way they do things is <u>fine</u> .	3	4
REALLY TRUE FOR ME	SORT OF TRUE FOR ME	X	Q#	Y	SORT OF TRUE FOR ME	REALLY TRUE FOR ME

RETURN TO CHILD SUPPLEMENT AT SPPC-EXEC.

THIS PAGE INTENTIONALLY BLANK

Memory for Digit Span

AGES: CHILDREN 7-11 YEARS

*(CALLED BY **DIGIT-EXEC** OF CHILD SUPPLEMENT.)*

[IF NEEDED, READ TO MOTHER/GUARDIAN.]

This section gives us an idea of (Child Name)'s memory for number order. Each sequence of numbers has more digits than the last. It is rare for anyone to remember all the sequences.

INSTRUCTIONS FOR DIGITS FORWARD.

ADMINISTER QUESTIONS:

- (1) READ EACH DIGIT SPAN **ONLY ONCE** AT AN EVEN RATE OF 1 DIGIT PER SECOND.
- (2) READ PART A OF QUESTION; PAUSE FOR RESPONSE, THEN SCORE.
- (3) READ PART B OF QUESTION; PAUSE FOR RESPONSE, THEN SCORE.
- (4) IF CHILD DOES NOT RESPOND, DO **NOT** ENCOURAGE FURTHER.
- (5) STOP WHEN CHILD MISSES PART A **AND** PART B OF ANY **ONE** QUESTION.

SCORE QUESTIONS:

- (1) TO BE SCORED CORRECT, NO DIGITS MAY BE OMITTED OR BE IN REVERSE ORDER.
-

DIGITS FORWARD

READ TO CHILD:

I am going to say some numbers. Listen carefully, and when I am through, say them right after me. SAY: "Ready" BEFORE EACH QUESTION.

(One item is shown per screen; e.g., item 1A is shown on one screen, and item 1B on the next)

	CORRECT	WRONG
1. A. 3 - 8 - 6	1	2
B. 6 - 1 - 2	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

2. A. 3 - 4 - 1 - 7	1	2
B. 6 - 1 - 5 - 8	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

3. A. 8 - 4 - 2 - 3 - 9	1	2
B. 5 - 2 - 1 - 8 - 6	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

4. A. 3 - 8 - 9 - 1 - 7 - 4	1	2
B. 7 - 9 - 6 - 4 - 8 - 3	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

5. A. 5 - 1 - 7 - 4 - 2 - 3 - 8	1	2
B. 9 - 8 - 5 - 2 - 1 - 6 - 3	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

6. A. 1 - 6 - 4 - 5 - 9 - 7 - 6 - 3	1	2
B. 2 - 9 - 7 - 6 - 3 - 1 - 5 - 4	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

7.	A. 5 - 3 - 8 - 7 - 1 - 2 - 4 - 6 - 9	1	2
	B. 4 - 2 - 6 - 9 - 1 - 7 - 8 - 3 - 5	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO DIGITS BACKWARD.

DIGITS BACKWARD

READ: Now I am going to say some more numbers, but this time when I stop, I want you to say them backward. For example, if I say 9-2-7, what would you say?

PAUSE FOR THE CHILD TO RESPOND. DID CHILD RESPOND CORRECTLY (7-2-9)?

YES(7-2-9) SAY: That's right. Let's go on with the rest of the numbers.

PROCEED TO 1ST ITEM

NO.... SAY: No, you would say 7-2-9. I said 9-2-7, so to say it backward you would say 7-2-9. Now try these numbers. Remember, you are to say them backward: 3-6-5.

WHETHER THE CHILD IS CORRECT OR WRONG ON THE SECOND EXAMPLE, THE TEST WILL PROCEED.

(One item shown per screen.)

		CORRECT	WRONG
8.	A. 2 - 5 (ANS = 5-2)	1	2
	B. 6 - 3 (ANS = 3-6)	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO INTERVIEWER REMARKS.

9.	A. 5 - 7 - 4 (ANS = 4-7-5)	1	2
	B. 2 - 5 - 9 (ANS = 9-5-2)	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO INTERVIEWER REMARKS.

10.	A. 7 - 2 - 9 - 6 (ANS = 6-9-2-7)	1	2
	B. 8 - 4 - 9 - 3 (ANS = 3-9-4-8)	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO INTERVIEWER REMARKS.

11.	A. 4 - 1 - 3 - 5 - 7 (ANS = 7-5-3-1-4)	1	2
	B. 9 - 7 - 8 - 5 - 2 (ANS = 2-5-8-7-9)	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO INTERVIEWER REMARKS.

12.	A. 1 - 6 - 5 - 2 - 9 - 8 (ANS = 8-9-2-5-6-1)	1	2
	B. 3 - 6 - 7 - 1 - 9 - 4 (ANS = 4-9-1-7-6-3)	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO INTERVIEWER REMARKS.

		CORRECT	WRONG
13.	A. 8 - 5 - 9 - 2 - 3 - 4 - 2 (ANS = 2-4-3-2-9-5-8)	1	2
	B. 4 - 5 - 7 - 9 - 2 - 8 - 1 (ANS = 1-8-2-9-7-5-4)	1	2

CAPI CHECK: IF BOTH A & B ARE CODED WRONG, SKIP TO INTERVIEWER REMARKS.

14.	A. 6 - 9 - 1 - 6 - 3 - 2 - 5 - 8 (ANS = 8-5-2-3-6-1-9-6)	1	2
	B. 3 - 1 - 7 - 9 - 5 - 4 - 8 - 2 (ANS = 2-8-4-5-9-7-1-3)	1	2

RETURN TO CHILD SUPPLEMENT AT *DIGIT-EXEC*****

PIAT Math

AGES: CHILDREN PPVT AGE 5-14 YEARS

(CALLED BY MATH-EXEC OF CHILD SUPPLEMENT.)

INTERVIEWER: [IF NEEDED, READ TO MOTHER/GUARDIAN.]

This section measures (Child's Name's) mathematical skills. The questions begin at a very basic skill level and go to a very high skill level. No one is expected to answer all the questions.

PRACTICE EXERCISES.

CAPI CHECK: IS CHILD IN 1ST GRADE OR HIGHER?

YES(GO TO B)

NO(GO TO A)

A. PRACTICE EXERCISES FOR CHILDREN NOT YET IN 1ST GRADE.

- (1) TURN TO "INTRODUCTION TO THE MATHEMATICS SUBTEST" (IN PIAT VOLUME I). READ: Let's start with some math problems. First, we'll do some just for practice to show you what they are like.
- (2) FOLLOW TEXT IN EASEL FOR PRACTICE EXERCISES A – E.

B. NO PRACTICE FOR CHILDREN IN 1ST GRADE OR HIGHER.

READ: We are going to start with some mathematics problems. Some of the first ones would be too easy for you, so let's start with this one.

CAPi CHECK: SKIP TO THE APPROPRIATE STARTING QUESTION BASED ON CHILD'S CURRENT GRADE.

KINDERGARTEN	
OR LESS.....	(GO TO Q.1) 00
1ST GRADE	(GO TO Q.15) 01
2ND GRADE	(GO TO Q.25) 02
3RD GRADE	(GO TO Q.30) 03
4TH GRADE.....	(GO TO Q.35) 04
5TH GRADE.....	(GO TO Q.40) 05
6TH GRADE.....	(GO TO Q.45) 06
7TH GRADE.....	(GO TO Q.50) 07
8TH GRADE.....	(SKIP TO Q.54) 08
9TH GRADE.....	(SKIP TO Q.58) 09
10TH GRADE.....	(SKIP TO Q.60) 10
11TH GRADE.....	(SKIP TO Q.62) 11
12TH GRADE	
(OR HIGHER)	(SKIP TO Q.64) 12

Note: Interviewer turns to appropriate easel page and proceeds.

BASAL=5 of 5 CORRECT
CEILING=5 OF 7 WRONG

IF STARTING Q. IS WRONG, PROGRAM DROPS BACK TO NEXT GRADE LEVEL UNTIL CHILD ANSWERS CORRECTLY, THEN PROCEEDS FORWARD.

IF CHILD CAN'T GET 5 IN A ROW CORRECT, PROGRAM WORKS BACK, ITEM BY ITEM TO GET BASAL, THEN PROCEEDS FORWARD.

RETURN TO CHILD SUPPLEMENT AT PRR-EXEC.

PIAT Reading Comprehension

(IF CHILD'S READING RECOGNITION SCORE IS 19 OR HIGHER)

(CALLED BY PRC-EXEC OF CHILD SUPPLEMENT.)

CAPI CHECK: IF CHILD SCORED 19 OR HIGHER THEN PROGRAM CONTINUES. OTHERWISE A MESSAGE IS DISPLAYED "RESPONDENT SCORED LESS THAN 19 ON READING RECOGNITION - READING COMPREHENSION WILL NOT BE ADMINISTERED" AND PROGRAM RETURNS TO CHILD SUPPLEMENT AT PRC-EXEC.

[IF NEEDED, READ TO MOTHER/GUARDIAN.]

This section measures (Child Name)'s ability to understand what (*he/she*) reads. The questions begin at a very basic skill level and go to a very high skill level. No one is expected to answer all the questions.

PRACTICE EXERCISES.

A. CAPI CHECK: IS CHILD IN 1ST GRADE OR HIGHER GRADE?

YES..... (SKIP TO C)1
NO.....(GO TO B)0

B. PRACTICE FOR CHILDREN NOT YET IN 1ST GRADE.

(1) READ:

Now I want to find out how well you understand and remember what you read. Let us practice again a little so you will know what I want you to do.
(GO TO PRACTICE A.)

(2) FOLLOW TEXT FOR PRACTICE EXERCISES.

C. NO PRACTICE FOR CHILDREN IN 1ST GRADE OR HIGHER. READ:

Now I want to find out how well you can understand and remember what you read. But, first, let me explain what you are to do. I am going to show you a page. It will have only a sentence printed on it. Read this sentence silently (PAUSE) to yourself (PAUSE) just once. When you have finished, look up at me. Then I will show you the next page which will have four pictures on it. You are to (show me/point to/tell me the number of) the picture that best describes what you have read. Be sure to remember what you have read, once, and then look up at me.

CAPI CHECK: RECORD SCORE FROM PIAT READING RECOGNITION, (COMPUTE SCORE ITEM D). SKIP TO STARTING Q# BASED ON READING RECOGNITION SCORE. [JUMP TO APPROPRIATE SCREEN AND PROCEED.]

(STARTING Q# FROM READING RECOGNITION) →

BASAL = 5 OF 5 CORRECT
CEILING = 5 OF 7 WRONG

IF STARTING Q. IS WRONG, PROGRAM JUMPS BACK 5 UNTIL
CHILD ANSWERS CORRECTLY, THEN PROCEEDS FORWARD.

IF CHILD CAN'T GET 5 IN A ROW CORRECT, PROGRAM
WORKS BACK, ITEM BY ITEM TO GET BASAL.

CAPI CHECK: BE SURE TO CODE EVERY ANSWER.

RETURN TO CHILD SUPPLEMENT AT PRC-EXEC.

THIS PAGE INTENTIONALLY BLANK

Peabody Picture Vocabulary Test (PPVT-R)

AGES: CHILDREN PPVT AGE 4-5 or 10-11 YEARS

(CALLED BY PPVT-EXEC OF CHILD SUPPLEMENT.)

[IF NEEDED, READ TO MOTHER/GUARDIAN]

This section is designed to measure (Child Name)'s vocabulary. Children usually enjoy doing this. I tell (him/her) a word and (he/she) looks at four pictures and tells me which picture has the same meaning as the word I said.

CAPI CHECK: DETERMINE APPROPRIATE START POINT FOR PRACTICE ITEMS.

IS CHILD'S PPVT AGE . . .

4 YRS – 5 YRS(GO TO INSTRUCTION SCREEN 1)

10 YRS – 11 YRS(GO TO INSTRUCTION SCREEN 2)

INSTRUCTION SCREEN 1: (PPVT age 4-5 years)

PRACTICE A: GO TO TRAINING PLATE A AND SAY TO CHILD: I want you to look at some pictures with me. See all the pictures on the screen? (POINT TO EACH PICTURE.) I will say a word; then I want you to put your finger on the picture of the word I have said. If you are not sure, just tell me your best guess. Let's try one. Put your finger on the picture of doll. (*See Screen Capture: Figure 20*)

<u>doll</u>	(4)	CORRECT..... GO TO PRACTICE B.
fork	(1)	WRONG..... ASK ALTERNATE WORDS, THEN GO TO
table	(2)	PRACTICE B.
car	(3)	

PRACTICE B: GO TO TRAINING PLATE B. PROCEED AS IN PRACTICE A.

<u>man</u>	(2)
comb	(3)
sock	(4)
mouth	(1)

PRACTICE C: GO TO TRAINING PLATE C. PROCEED AS IN PRACTICE A.

<u>swinging</u>	(3)
drinking	(4)
walking	(1)
climbing	(2)

INSTRUCTION SCREEN 2: (PPVT age 10-11 years)

READ TO CHILD: I have some pictures to show you/OR (FOR OLDER CHILDREN) I want to find out how large your vocabulary is.

PRACTICE D: GO TO TRAINING PLATE D AND READ:

See, there are four pictures. Each of them is numbered (POINT). I will say a word; then I want you to tell me the number of, or point to, the picture that best tells the meaning of wheel. If you are not sure, tell me your best guess. PROCEED AS IN PRACTICE A.

<i>wheel</i>	(4)
<i>zipper</i>	(2)
<i>rope</i>	(1)
<i>rake</i>	(3)

PRACTICE E: GO TO TRAINING PLATE E. PROCEED AS IN PRACTICE D.

<i>giant</i>	(1)
<i>bride</i>	(3)
<i>witch</i>	(4)
<i>royal</i>	(2)

CAPICHECK: SKIP TO STARTING QUESTION BASED ON THE CHILD'S PPVT AGE...

Note: Interviewer finds appropriate item and proceeds.

Assessment Screens

SAMPLE SCREENS - WHAT I AM LIKE (SPPC)

The interviewer sees the following two instruction screens at the start of the What I Am Like assessment.

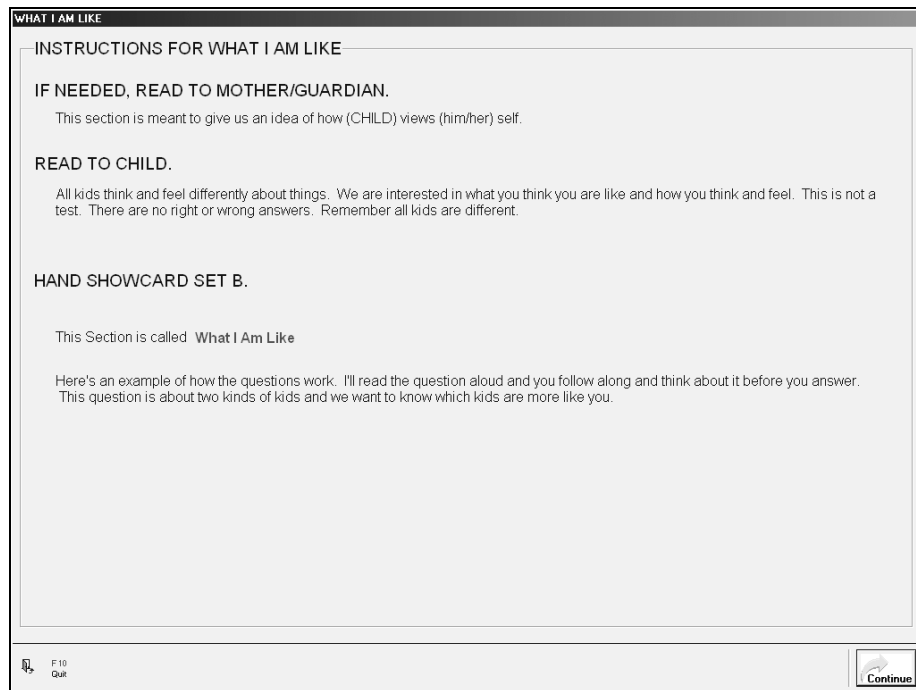

Figure 2. The first instruction screen of the What I Am Like assessment.

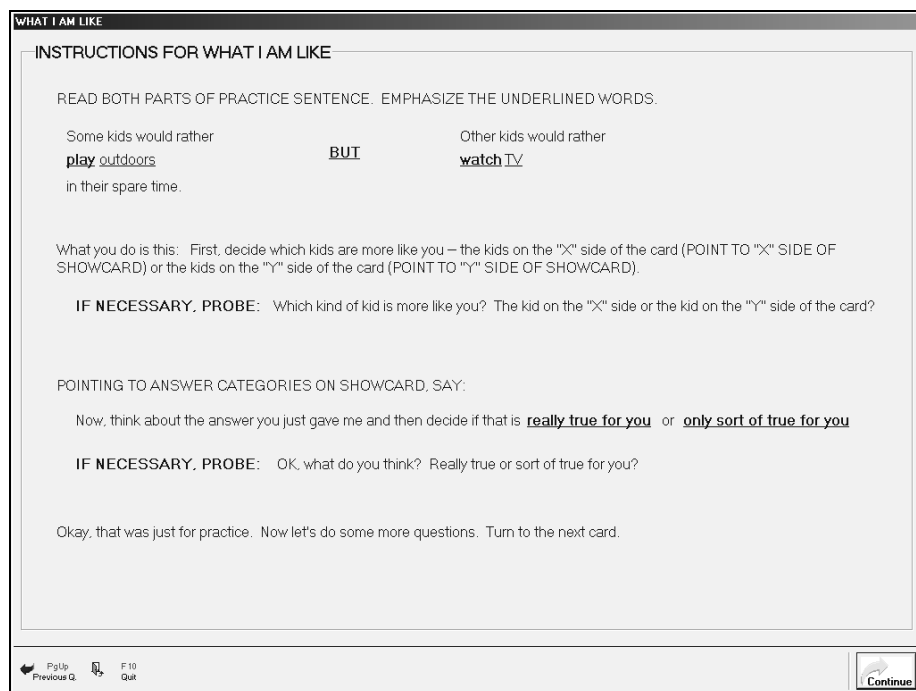

Figure 3. The second instruction screen of the What I Am Like assessment.

WHAT I AM LIKE

Question # 1

⌂ X

Some kids feel they are very good at their school work.

REALLY TRUE FOR ME SORT OF TRUE FOR ME

⌂ 1 ⌂ 2

BUT

⌂ Y

Other kids worry about whether they can do the school work assigned to them.

SORT OF TRUE FOR ME REALLY TRUE FOR ME

⌂ 3 ⌂ 4

Figure 4. Question 1 of the What I Am Like Assessment is representative of assessment items as seen by the interviewer. The interviewer enters the respondent's selection of X or Y, then the respondent's selection of "really true for me" or "sort of true for me." One question item is shown per screen.

SIDE ONE

REALLY TRUE FOR ME	SORT OF TRUE FOR ME	X	Q#	Y	SORT OF TRUE FOR ME	REALLY TRUE FOR ME
4	3	Some kids feel they are very good at their school work.	1. BUT	Other kids worry about whether they can do the school work assigned to them.	2	1
1	2	Some kids are often unhappy with themselves.	2. BUT	Other kids are pretty pleased with themselves.	3	4
4	3	Some kids feel like they are just as smart as other kids their ages.	3. BUT	Other kids aren't so sure and wonder if they are as smart.	2	1
1	2	Some kids don't like the way they are leading their life.	4. BUT	Other kids do like the way they are leading their life.	3	4
1	2	Some kids are pretty slow in finishing their school work.	5. BUT	Other kids can do their school work quickly .	3	4
4	3	Some kids are happy with themselves as a person.	6. BUT	Other kids are often not happy with themselves as a person.	2	1

There are a few more of these. Turn the card over.

SAMPLE SCREENS - MEMORY FOR DIGIT SPAN

MEMORY FOR DIGIT SPAN ASSESSMENT

INSTRUCTIONS FOR DIGITS FORWARD

IF NEEDED, READ TO MOTHER/GUARDIAN.

This section gives us an idea of (CHILD)'s memory for number order. Each sequence of numbers has more digits than the last. It is rare for anyone to remember all the sequences.

INSTRUCTIONS FOR DIGITS FORWARD

ADMINISTER QUESTIONS:

1. READ EACH DIGIT SPAN **ONLY ONCE** AT AN EVEN RATE OF 1 DIGIT PER SECOND.
2. READ PART A OF QUESTIONS; PAUSE FOR RESPONSE THEN SCORE.
3. READ PART B OF QUESTION; PAUSE FOR RESPONSE THEN SCORE.
4. IF CHILD DOES NOT RESPOND, DO **NOT** ENCOURAGE FURTHER.

SCORE QUESTIONS:

1. TO BE SCORED CORRECT, NO DIGITS MAY BE OMITTED OR BE IN REVERSE ORDER.

MEMORY FOR DIGIT SPAN ASSESSMENT

Digits Forward

READ TO CHILD IF NECESSARY

I'm going to say some numbers. Listen carefully, and when I'm through, say them right after me.

SAY: 'Ready' BEFORE EACH QUESTION.

Question # 1.A 3 - 8 - 6

Correct
Wrong

Figure 6. Question 1 of the Digits Forward section of the Memory for Digit Span assessment is representative of assessment items as seen by the interviewer. The interviewer enters whether the respondent is correct or wrong.

MEMORY FOR DIGIT SPAN ASSESSMENT

INSTRUCTIONS FOR DIGITS BACKWARD

READ TO CHILD.

A. READ: **Now I am going to say some more numbers, but this time when I stop, I want you to say them backwards. For example, if I say 9-2-7, what would you say?**

B. PAUSE FOR THE CHILD TO RESPOND. DID CHILD RESPOND CORRECTLY (7-2-9)?

YES (7-2-9) SAY : **That's right. Let's go on with the rest of the numbers.**
CLICK ON THE CONTINUE BUTTON TO PROCEED TO 1ST ITEM.

NO SAY: **Now try these numbers.**
Remember you are to say them backwards : 5-6-3 (3-6-5)

C. WHETHER THE CHILD IS CORRECT OR WRONG ON THE SECOND EXAMPLE, THE TEST WILL PROCEED.

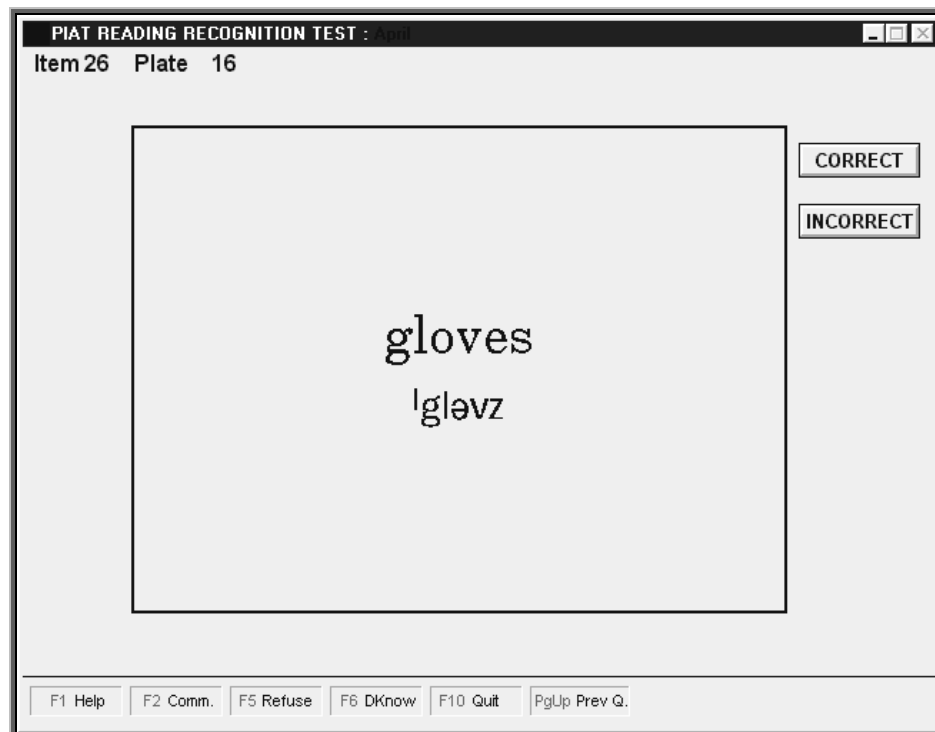

Figure 14. Plate 16 is representative of PIAT Reading Recognition items presented later in the assessment.

SAMPLE SCREENS - PIAT READING COMPREHENSION

PIAT READING COMPREHENSION

PIAT READING COMPREHENSION TEST INSTRUCTIONS

Say the following :

Now I want to find out how well you understand and remember what you read.

INSTRUCTION TO EXERCISE A

I am going to show you a page. It will have only a sentence printed on it. Read the sentence silently (pause) to yourself (pause) just once. When you have finished, look up at me. Then I will show you the next page which will have four pictures on it. You are to show me (point to, tell me the number of) the picture that best describes what you have read. Be sure to remember what you have read, because you cannot look back. Let's try one.

Figure 15. Instruction screen read by the Interviewer to the mother and child for children who have not reached the 1st grade.

PIAT READING COMPREHENSION

PIAT READING COMPREHENSION TEST INSTRUCTIONS

Say the following :

Now I want to find out how well you can understand and remember what you read. But, first, let me explain what you are to do. I am going to show you a page. It will have only a sentence printed on it. Read this sentence silently (pause) to yourself (pause) just once. When you have finished, look up at me. Then I will show you the next page which will have four pictures on it. You are to show me (point to, tell me the number of) the picture that best describes what you have read. Be sure to remember what you have read, because you cannot look back. Let's try one. Read this sentence silently – just once, and then look up at me. (During administration of this subtest, examiner should monitor the subject's eye movements and, if needed, remind him to read the passage just once.) (Turn to the subject's starting item.)

INSTRUCTION TO EXERCISE A

I have some pictures to show you, so I can find out how large your vocabulary is.
